

# Star P2 星行侠®

——Robotics with a Human Touch——

Star(星行侠®) P2 is a next-generation intelligent interactive robot that supports multi-robot collaboration and is compatible with a variety of optional modules. It integrates motion intelligence, interactive intelligence, and scenario intelligence, making it suitable for applications in government service halls, banks, libraries, telecom operators, cultural tourism, and other scenarios.

## Advantages

- Patented dual-mode design (bipedal/wheeled), one-person boarding & dismounting
- 10h battery life, auto recharging
- Advanced motion: side flips & multiple ethnic dances
- Long-term memory, knows you better over time
- 20+ language support (Cantonese, English, French, etc.)
- Face recognition proactive greetings & 40+ expressions
- Compatible with RoboEase scenario brain

## Degrees of Freedom (DoF)

- 34 DoF

## Dimensions

- Body: 131cm
- Body Weight: approx. 39kg;

## Payload

- Single Arm Payload: 0.5kg

## Mobility

- Maximum Speed:  $\geq 1.8\text{m/s}$

## Endurance

- $\geq 10$  hours

## Financial Outlets

Post No.1 duty, lobby guidance, business consultation, anti-fraud awareness.

## Government Services

Service guidance, policy interpretation, procedure navigation, complaint reception.

## Education & Research

Multi-modal interaction, empowering R&D and K12 teaching assistance.

## Tourism Services

Tourist center consultation, and tour guiding services.
